

FOMITE: Any inanimate object or substance capable of carrying infectious organisms, such as germs or parasites, and hence transferring them from one individual to another.

- HDPE - High density polyethylene
- PE - Polyethylene
- PET - Polyethylene terephthalate
- PLA - Polylactic Acid
- PP - Polypropylene
- PVC -Polyvinyl chloride

Life Cycle Assessment (LCA): Identifies the material and energy usage, emissions and waste flows of a product, process or service over its entire life cycle to determine its environmental performance.

Caption:

Working towards an end goal of perfect harmony between technological development and environmental protection and sustainability is *not* a frivolous endeavor and shouldn't be disregarded. *However*, there is a difference between actual progress and feel-good regulation and policy. The biggest hurdle for environmental activists is valuing emotional appeal over scientific valuation. A more educated understanding of production, consumption and recycling is the key to achieving a world of both natural and technological beauty.
